

- have servers poll every week

- in mobile, have an interactive map

that can be zoomed in
=,

6014.300 .6

size: int · categories, counties

72000.6. 432000
43 megs.

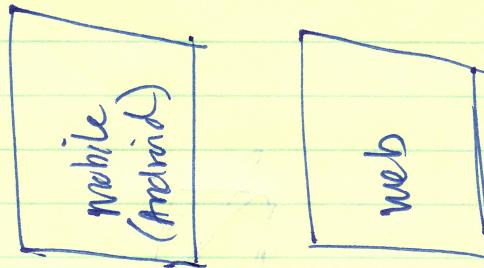

- ignore current month because not enough data
- ~~max data limit is only 12~~ maybe should limit data, don't keep from two days ago
- predo calculations for the most popular food items before

- will not be able to do popularity because people don't come back and write more reviews

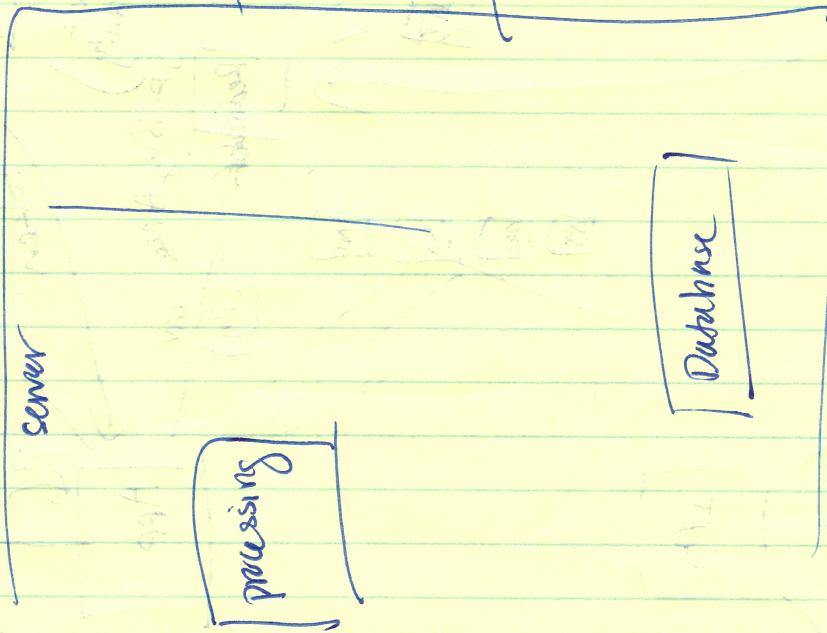

~~fusion~~

- fusion restaurants or family ones? Buffets

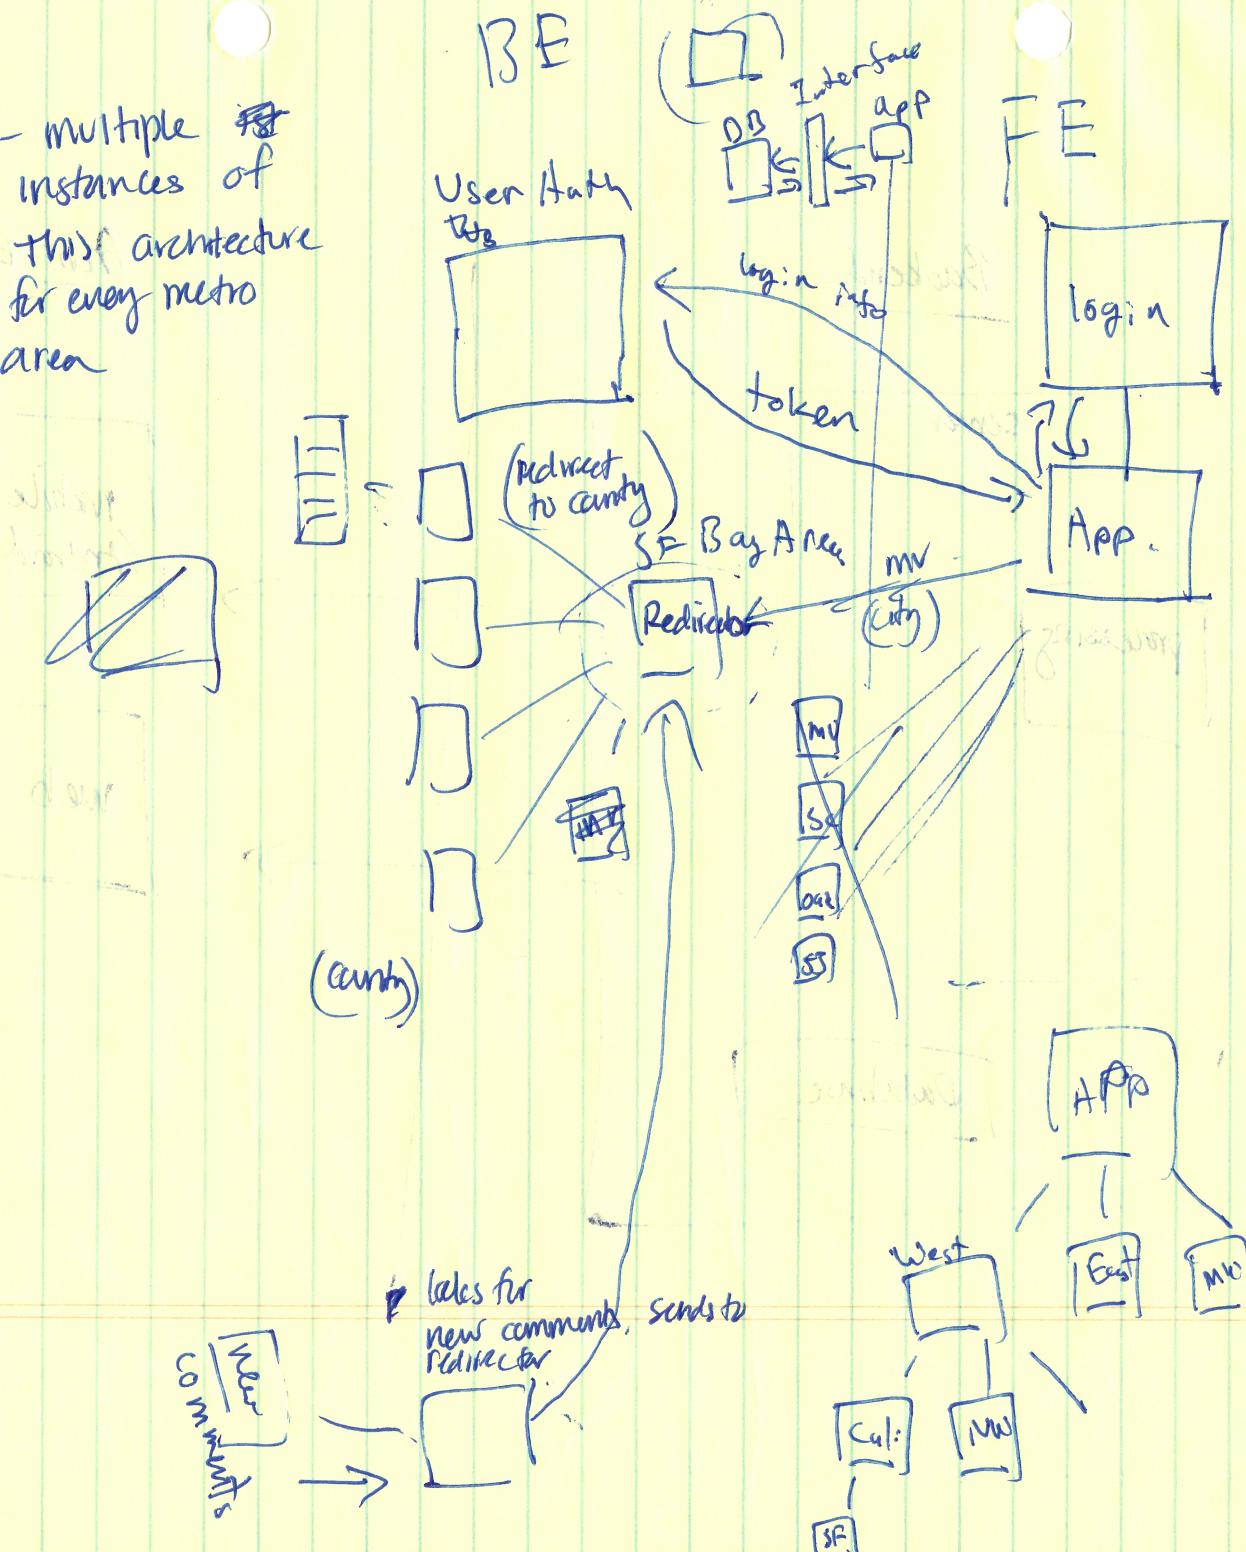

Front End

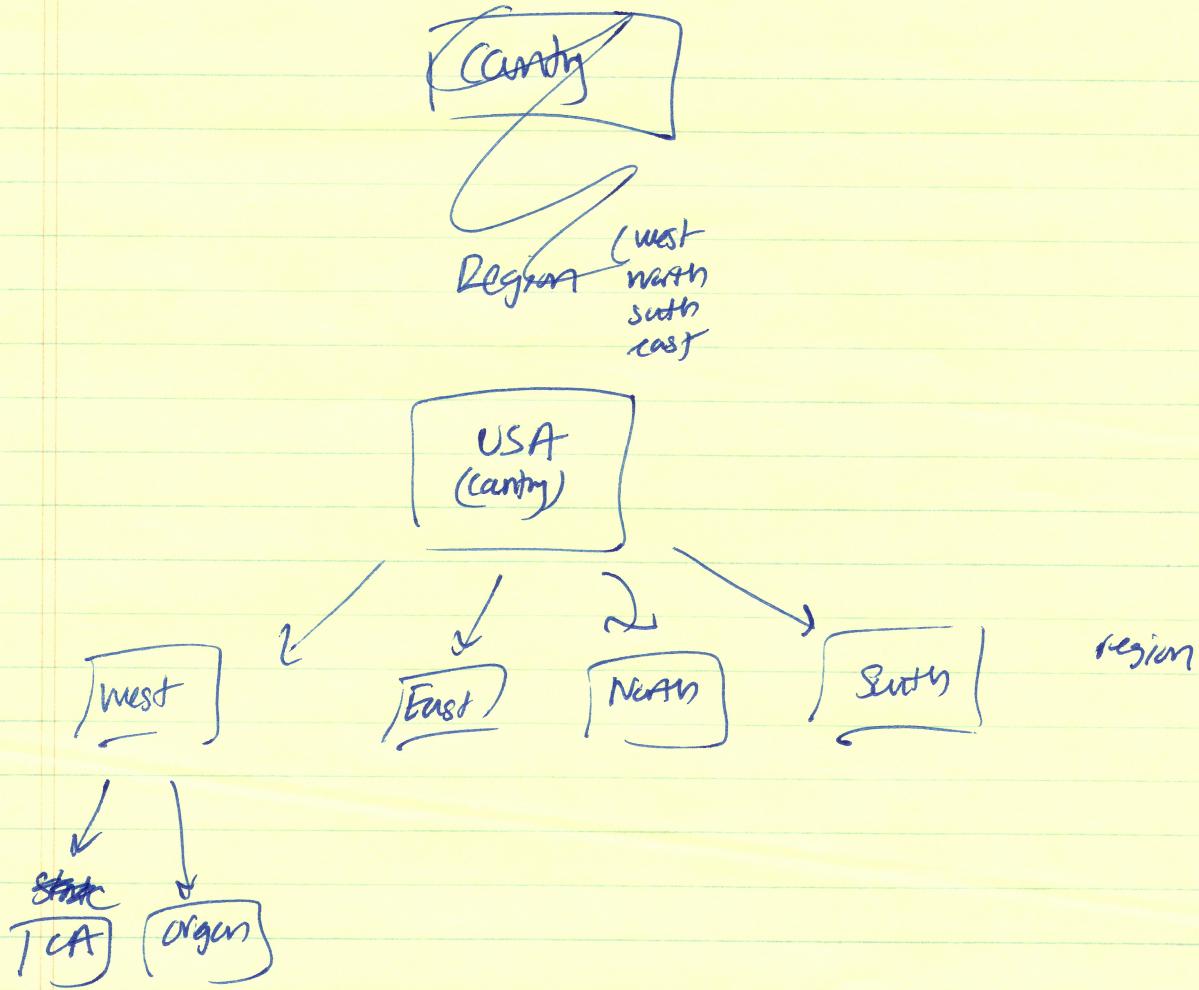

Backend

- multiple instances of this architecture for every metro area

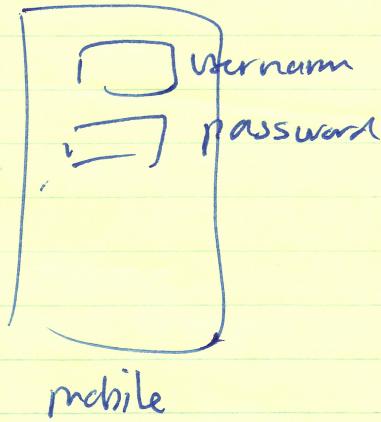

D

Languages :

Python, Java.

Frontend
- Java (ajax)

Backend
- python
- database: MySQL
